MARKING SCHEME — REVISION PAPER 001

Grade: 7 **Subject:** Mathematics **Total:** 40 marks

Award method marks for correct working even if a final arithmetic error occurs. Do not award the same mark twice for the same step.

QUESTION 1: WHOLE NUMBERS (5 marks)

a) 600,000 — **1 mark**

b) 4,630,000 — **1 mark**

c) HCF = 12 — **1 mark**

d) Prime — **1 mark**

e) 21 — **1 mark**

QUESTION 2: FACTORS (4 marks)

a) $36 = 2^2 \times 3^2$. Award 1 mark for identifying prime factors 2 and 3, and 1 mark for correct powers and final expression.

b) 7, 14, 21, 28 — ½ mark for each correct multiple (2 marks).

QUESTION 3: FRACTIONS AND DECIMALS (6 marks)

a) 3/4 + 2/5 = 15/20 + 8/20 = 23/20 = 1 3/20.

• Correct common denominator and equivalent fractions — 1 mark.

• Correct final answer — 1 mark.

b) 2.75 – 0.80 = 1.95.

• Correct decimal alignment and subtraction — 1 mark.

• Correct answer — 1 mark.

c) (3/5) × 45 = 27.

• Correct method — 1 mark; correct answer — 1 mark.

QUESTION 4: ALGEBRA (6 marks)

a) 3x + 5x – 2 = 8x – 2. Collecting like terms — 1 mark; correct expression — 1 mark.

b) 2x + 7 = 19; 2x = 19 – 7 = 12; x = 6. Correctly obtaining 2x = 12 — 1 mark; x = 6 — 1 mark.

c) 2a – b = 2(4) – 3 = 8 – 3 = 5. Correct substitution — 1 mark; correct answer — 1 mark.

QUESTION 5: MEASUREMENT (6 marks)

a) Perimeter = 2(l + w) = 2(8 + 5) = 26 m. Formula/substitution — 1 mark; answer with unit — 1 mark.

b) Area = l × w = 8 × 5 = 40 m². Method — 1 mark; answer with unit — 1 mark.

c) 2.5 × 1,000 = 2,500 mL. Conversion factor — 1 mark; answer — 1 mark.

QUESTION 6: GEOMETRY (5 marks)

a) x + 65° = 180°; x = 180° – 65° = 115°. Uses 180° — 1 mark; answer — 1 mark.

b) 180° – (50° + 60°) = 70°. Method — 1 mark; answer — 1 mark.

c) Right angle — 1 mark.

QUESTION 7: DATA HANDLING (4 marks)

a) Mode = 3 and 5 — 1 mark. Both occur three times, so the data set has two modes.

b) Range = 5 – 3 = 2 — 1 mark.

c) Mean = (3 + 5 + 4 + 3 + 5 + 4 + 3 + 5) ÷ 8 = 32 ÷ 8 = 4.

• Correct total and division by 8 — 1 mark; correct mean — 1 mark.

QUESTION 8: MONEY (4 marks)

a)(i) Discount = (10/100) × 750 = KSh 75 — 1 mark.

a)(ii) Price after discount = 750 – 75 = KSh 675 — 1 mark.

b) (3 × 45) + 30 = 135 + 30 = KSh 165. Cost of three books — 1 mark; correct total — 1 mark.

MARK SUMMARY

Question	Marks
1. Whole Numbers	5
2. Factors	4
3. Fractions and Decimals	6
4. Algebra	6
5. Measurement	6
6. Geometry	5
7. Data Handling	4
8. Money	4
TOTAL	**40**
